PROFESSIONAL SUMMARY

Computer Systems Engineer with experience in software development for the telecommunications industry, motivated and with the desire to expand my programming and development skills through innovative challenges.

HABILIDADES

- **Frontend Development:** HTML, CSS, SASS/SCSS, JavaScript, TypeScript.
- **Frontend Frameworks / Libraries:** React, Angular.
- **Git / GitHub**
- **RESTFUL APIs:** Endpoint consumption and management.
- **Jest:** Unit and integration tests.
- **Express.js:** Framework for Node.js, route configuration, middleware.
- **MySQL:** Connection and queries to databases.

LABORAL EXPERIENCE

Telecom Engineer | Evaltech | Mexico City | June 2023 – June 2024

• I developed custom scripts to extract and transform data from Excel files, making it easier to use in future software projects and improving productivity.

• I designed and developed interactive user interfaces for web applications, ensuring adherence to industry standards and customer requirements, using technologies such as Angular.

• I configured, installed and updated SQL databases using MySQL for web applications.

• I participated in telephone approval projects, ensuring compliance with customer regulations and specifications, achieving the successful approval of 6 Android models.

PROJECTS

Homologation Control: I developed a full web application using Angular and Node.js. It tracks the history of approved devices, allowing users to add, edit, and view device information with advanced filtering options. The system also supports exporting data to Excel files, improving data management efficiency.

Degree Project: I contributed to developing an interactive web application to help companies educate their staff on web security through game and animation challenges. I focused on developing interactive components using React and Python, and successfully deployed the application on Azure.

My Portfolio: I created a portfolio where you can see all my personal projects through my website or by visiting my GitHub account.

EDUCATION

Computer Systems Engineering | Escuela Superior de Cómputo IPN, Mexico City | 2019 - 2023

Introduction to Frontend | Curies Community, Ciudad de México | 2023

English B2 Certificate | Celex IPN | 2016 - 2019
